WHY IV INFUSION THERAPY?

WHY IV INFUSION THERAPY?

Intravenous (IV) Vitamin and Nutrient infusions may offer you the best alternative to improving your health and wellness naturally. We live in a time when obtaining the needed amounts of vitamins, minerals, amino acids, and antioxidants are difficult with diet alone! The IV route allows for up to 95% absorption of nutrients as opposed to the standard oral route of typically less than 35% with tablets, capsules, and liquids.
